

Wow! The Walker is the perfect play structure for active toddlers. Children will play and develop in all areas, which will lead to longer playtimes. Physical development will be enhanced by sliding and crawling, which strengthens muscles and builds important coordination skills. These experiences are also enhanced by the design of the structure which encourages social play in such areas as the sand scoops panel, the desk, and the megaphone. Social play strengthens children's ability to cooperate and get along With others and also their ability to empathize and make friends. This structure also supports creative and cognitive play with the sand scoops and the desk area, making this structure perfect for supporting all areas of development through active play.
